DETAILED ACTION

Specification

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 13-18 are rejected under 35 U.S.C. 101 because the claim is directed to a computer program storing nonfunctional descriptive material.

Computer programs not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical “things” nor statutory processes. See, e.g. Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. See MPEP 2106.IV.B.1.

Allowable Subject Matter

4. Claims 1-12, and 19-21, contain allowable subject matter over the prior art.
5. The following is an examiner’s statement of reasons for allowance:
6. The claimed invention is directed to a multimedia player capable of playing back digital contents. The independent claims identify the feature of "menu controller which generates image data for the on-screen menu which includes the plurality of medium icons wherein the reader reads, from the external storage medium installed in the

Art Unit: 2621

multimedia player, a menu item visually representing a summary of the content stored in the external storage medium and including an image generated according to a rule where the size does not overlaps the array of icons included in the on-screen menu or the size matches the size of the entirety on-screen menu and the menu controller visually highlights the medium icon which the user selected as a focus of attention, and displays the menu item image read from the external storage medium corresponding to the highlighted medium icon in the on-screen menu". The closest prior art, Ning discloses a conventional recording/reproducing apparatus including displaying menu capability, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ning discloses a conventional recording/reproducing apparatus including displaying menu capability.

Miyashita discloses an image pickup and reproducing apparatus.
